## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 05 August 2005 has been entered.

### ***Claim Objections***

Claim 17, line 6, is seen to be awkward as reciting the step of "comparing ...differentially". It is suggested this be changed to --differentially comparing--. Claim 18 is objected to for the reasons of claim 17. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 5, 6 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by D'Angelo (USPN 6,166,530).

With respect to claims 1, 3, 5, 6 and 12, D'Angelo discloses, in Figs. 5 and 7-9, a circuit comprising: "a power device (102)"; "a load (104)"; "a current sense circuit (110-112)"; "a first transistor (314 of Fig. 9)" having "a p-channel transistors"; "a short-circuit detection signal (GATE)" "as a logic signal"; "a second transistor (148 one or more of transistors 120-136)"; "a

Art Unit: 2816

differential comparator (302-308 and 318 of Fig. 9)” providing “an output that is associated with the short-circuit detection signal (signal between 308 and 308 of Fig. 9)”; and “a third p-type transistor” (140)”, all connected and operating similarly as recited by Applicant.

With respect to claims 13-16, D’Angelo discloses, in Fig. 5, a circuit comprising: “a power device (102)”; “a load (104)”; “a current sense means (110-112)”; “a disabling means (314 of Fig. 9)”; “a recovery current means (148 one or more of transistors 120-136)”; “a differential comparator (302-308 and 318 of Fig. 9)”; and “a minimum over-drive means (115)”, all connected and operating similarly as recited by Applicant.

With respect to claims 17-20, D’Angelo discloses, in Fig. 5, a circuit having “a power device (102)” and “a load (104)” that will provide the method comprising: “sensing a current (with 110-112)”; “sensing an output voltage (with 302-308 and 318 of Fig. 9)”; “comparing the sense signal with the sensed output voltage (with 302-308 and 318 of Fig. 9)”; “asserting a short-circuit detection signal (with 302-308 and 318 of Fig. 9)”; “disabling the power device (with 314)”; “enabling a current source (with 148-154)”; “detecting when the short-circuit condition is removed (with 110-112)”; “enabling the power device (when VREF falls below PILOT)”; and “maintaining a minimum overdrive condition (with 115)”.

With respect to claim 18, clearly the threshold of 110 and the resistance of 112 will vary responsive to changes in temperature.

Claims 2, 4 and 7-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2816

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Examiner has fully considered Applicant's remarks for the above rejection and has not found them to be persuasive. The above rejections have been modified with respect to the changes in the claims.
